

# 1. Order & Customer Information

This section defines the core transaction details and who the buyer is.

| Column Name                   | Explanation                                                                        |
|-------------------------------|------------------------------------------------------------------------------------|
| order_id                      | Unique identifier for each individual order.                                       |
| customer_id                   | Unique identifier that links a specific order to a customer.                       |
| customer_unique_id            | Permanent ID for a customer (used to track repeat buyers across different orders). |
| order_status                  | Current status of the order (e.g., delivered, shipped, canceled, invoiced).        |
| order_purchase_timestamp      | The exact date and time when the customer placed the order.                        |
| order_approved_at             | The date and time when the payment was officially approved.                        |
| order_delivered_carrier_date  | The date and time the package was handed over to the logistics partner.            |
| order_delivered_customer_date | The actual date the customer received their package.                               |

| Column Name                          | Explanation                                                               |
|--------------------------------------|---------------------------------------------------------------------------|
| <b>order_estimated_delivery_date</b> | The estimated arrival date shown to the customer at the time of purchase. |
| <b>customer_zip_code_prefix</b>      | The first five digits of the customer's zip code.                         |
| <b>customer_city</b>                 | The city where the customer is located.                                   |
| <b>customer_state</b>                | The state where the customer is located.                                  |

## 2. Product & Seller Details

This section describes the physical items sold and the vendors who provided them.

| Column Name                | Explanation                                                                                     |
|----------------------------|-------------------------------------------------------------------------------------------------|
| <b>order_item_id</b>       | Sequential number identifying the number of items within the same order (e.g., item 1, item 2). |
| <b>product_id</b>          | Unique identifier for the specific product.                                                     |
| <b>seller_id</b>           | Unique identifier for the seller/vendor.                                                        |
| <b>shipping_limit_date</b> | The deadline for the seller to ship the product to the carrier.                                 |

| Column Name                          | Explanation                                               |
|--------------------------------------|-----------------------------------------------------------|
| <b>price</b>                         | The unit price of the product.                            |
| <b>freight_value</b>                 | The shipping cost for that specific item.                 |
| <b>product_category_name</b>         | The name of the product category (in Portuguese).         |
| <b>product_category_name_english</b> | The translated name of the product category (in English). |
| <b>product_name_lenght</b>           | The number of characters in the product's name.           |
| <b>product_description_lenght</b>    | The number of characters in the product's description.    |
| <b>product_photos_qty</b>            | Total number of photos available for the product listing. |
| <b>product_weight_g</b>              | The weight of the product measured in grams.              |
| <b>product_length_cm</b>             | The length of the product in centimeters.                 |
| <b>product_height_cm</b>             | The height of the product in centimeters.                 |
| <b>product_width_cm</b>              | The width of the product in centimeters.                  |

| Column Name                   | Explanation                                     |
|-------------------------------|-------------------------------------------------|
| <b>seller_zip_code_prefix</b> | The first five digits of the seller's zip code. |
| <b>seller_city</b>            | The city where the seller is located.           |
| <b>seller_state</b>           | The state where the seller is located.          |

### 3. Payment & Review Data

This section covers how the order was paid for and the customer's feedback.

| Column Name                 | Explanation                                                                                  |
|-----------------------------|----------------------------------------------------------------------------------------------|
| <b>payment_sequential</b>   | Sequence of payments (if a customer used multiple methods, like two different credit cards). |
| <b>payment_type</b>         | The method of payment (e.g., credit card, boleto, voucher, debit card).                      |
| <b>payment_installments</b> | The number of installments chosen for the payment.                                           |
| <b>payment_value</b>        | The total amount paid for that specific payment line (includes freight).                     |
| <b>review_id</b>            | Unique identifier for the customer review.                                                   |

| Column Name                    | Explanation                                                       |
|--------------------------------|-------------------------------------------------------------------|
| <b>review_score</b>            | Rating given by the customer (ranging from 1 to 5 stars).         |
| <b>review_comment_title</b>    | The title or headline of the customer's written review.           |
| <b>review_comment_message</b>  | The actual text content of the customer's feedback.               |
| <b>review_creation_date</b>    | The date the review satisfaction survey was sent to the customer. |
| <b>review_answer_timestamp</b> | The exact date and time the customer submitted their review.      |
